

Back to the web

December 28, 2012 / Gavin Jackson

[bootstrap](#)[colorbox](#)[development](#)[easytabs](#)[jquery](#)[pyramid](#)[python](#)[tablesorter](#)[web](#)

I have been doing a fair bit of web development lately and thought it might be good to share some of the awesome new web development libraries I have been playing with. They all seem to be playing well with each other which is nice...

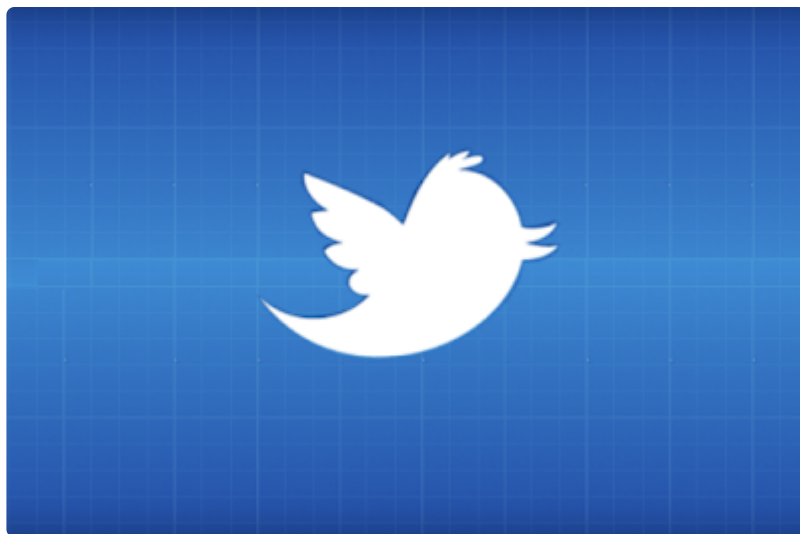

Pyramid™

Pyramid - a very flexible MVC web framework for Python. Website: <http://www.pylonsproject.org/>

Deform - a python HTML form library, this has an interactive demo page with lots of snippets to get you started, written by one of the core Pyramid contributors Website:

<http://pypi.python.org/pypi/deform> Demo site: <http://deformdemo.repoze.org/>

Twitter Bootstrap - the easiest way to build a responsive web application (a web application that renders correctly on both mobile, tablet and monitor), here are two additional sites that allow you to easily customise the look and feel <http://bootswatchr.com/> or download a pre-built theme

<http://bootswatch.com/>.

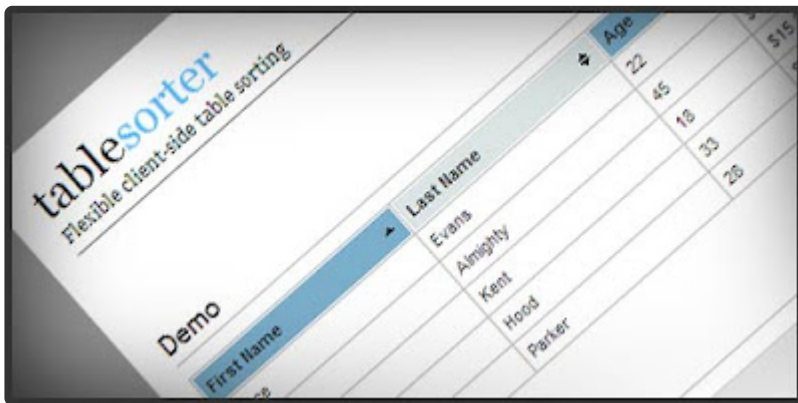

Website: <http://twitter.github.com/bootstrap/>

EasyTabs - This is a jquery plugin that makes it easy to create a nice looking tab interface. Website: <http://os.alfajango.com/easytabs/>

Colorbox - A flexible jquery based lightbox alternative, supports multiple media types, has 5 great looking themes that you can use out of the box and most importantly - works with tablesorter (see below).

Website: <http://www.jacklmoore.com/colorbox>

Tablesorter - Another jquery plugin that allows you to create sortable tables for the web. Sweet! <http://tablesorter.com> Seen anything else cool lately Let me know in the comments!
